IPS...the Plumbing Industry's Pioneer

For over a half century, IPS Corporation has been continually refining — and redefining — the technologies of the plumbing industry. We were the first company to produce a reliable cement for use with PVC, CPVC, and ABS pipe and fittings, and the first to introduce plastic recessed washing machine and icemaker outlet boxes.

Over the decades we have continued to improve our products and introduce new technologies that enable plumbers to do a faster, more professional job. Our products are proudly made at modern manufacturing facilities located throughout the world, and made available through a nationwide network of distributors who are committed to providing fast, efficient, and customer-focused service.
