

# MegaPress System

The Viega **MegaPress** fitting system is a state-of-the-art IPS press fitting system that provides an economical and reliable installation of schedule 5 to schedule 40 ASTM A53, A106, A135 and A795 steel pipes. Viega **MegaPress** fittings are available in sizes ranging from 1/2" to 2" and provide a fast, reliable, consistent joining method.

Our products are the result of decades of experience in manufacturing press fittings. The Viega **MegaPress** fitting system is offered in configurations that allow for the installation of the vast majority of black iron piping applications in the residential, commercial and industrial markets.

The Viega **MegaPress** fitting system requires no threading or welding and poses no fire hazard, which is particularly important in restoration or retrofit work. The press fittings are installed with a battery-powered or corded pressing tool.

**The advantages of installing Viega MegaPress fitting system include:**

- Most labor savings
- Lowest overall installed cost
- Proven joining technology
- Technical field support
- Drastically reduces installation time
- No special certification required

*Viega MegaPress fittings are constructed of carbon steel with a corrosion-resistant zinc/nickel coating. (For outdoor applications)*
