

ProPress Gas System

Viega ProPress is the original press pipe joining system and Viega was the first to develop a CSA certified copper press solution specifically for gas. Viega ProPressG fittings and valves allow fast, flameless connections using copper pipe, instead of heavy hard-to-handle black iron pipe that requires cutting threads for every connection.

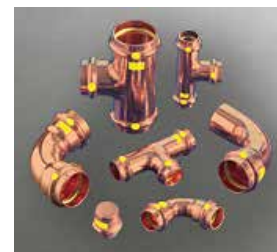

Viega ProPressG features and benefits

- Patented Smart Connect feature
- Makes secure connections in less than seven seconds
- Available in sizes 1/2" to 2"
- Widest variety of configurations on the market
- No flame, solder, flux or heavy equipment needed

The Viega ProPressG system is designed and engineered for use with a variety of applications, including natural gas, LP gas and fuel oil applications.

Since 1999, Viega ProPress has revolutionized pipe joining in North America. Now over one million Viega press fittings are installed every day around the world. Only Viega ProPress offers the genuine Smart Connect feature to help installers locate connections that have been missed.

You can identify a genuine Viega ProPressG fitting by the yellow dot which signifies the patented Viega Smart Connect feature with an HNBR sealing element.
